This is the first office action for application number 10/763,177, Display Orientation Adjustment Apparatus, filed on January 26, 2004.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Admitted Prior Art (Fig. 13). The Admitted Prior Art discloses a display orientation adjustment apparatus (H) for supporting a display in a manner that permits the display to pivot about an axis substantially perpendicular to a screen thereof, comprising: a movable part (110) attached to a rear surface of the display; a base (120) for pivotably supporting the movable part; stopper (132) for restricting a range of pivotal motion of the movable part; wherein if the movable part is pivoted beyond the restricted range by a pivoting force of a predetermined magnitude or greater, the stopper is released; wherein the movable part includes a sliding surface (113a) shaped like a spherical zone; and wherein the base includes a receiving surface (124) for slidable contact with the sliding surface.

***Allowable Subject Matter***

Claims 2-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
